

ABSTRACT

An applicator 10 of the present invention includes a liquid discharge head 11 for discharging a treatment liquid in droplet form and a discharge control device 13 for controlling the discharge of droplets from the liquid discharge head 11. The discharge control device 13 divides a surface 20a of a member 20 into a plurality of regions 40, 41, and 42 according to the shape of the surface 20a, and control the application quantity for each region.
